Foods, Schools, and General Storage Solutions

To give you the most display flexibility possible, we offer a variety of shelves specifically designed to work within our perimeter and floor fixtures. And each can be used in various elevations as a base, intermediate level, or top.

Top Shelf A hybrid of our Flat Top and Lip Shelf, the Top Shelf is a great way to cap the unit and prevent merchandise from falling behind it. It can also be used as an intermediate shelf in a back-to-back situation where an open look is needed.

Flat Top The Flat Top is the building block of basic Wire Weld displays. It finishes the top of your perimeter or floor units, as well as any required elevation. Flat Tops also highlight merchandise to create a waterfall effect by using different shelf depths.

Lip Shelves The Lip Shelf creates an angled surface ideal for displaying anything from shoes to magazines to placemats. Available in 2" and 4" options, Lip Shelves can also lie flat with the lip in the front or the rear of the unit, depending on the look you desire.

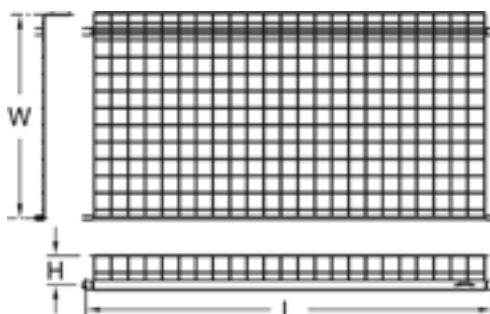

A wire shelf is an excellent value that requires minimal cleaning and provides circulation and visibility, as well as outstanding sprinkler coverage.

Weight Capacity Our Wiremesh Shelves have passed static load tests of up to 200 pounds per shelf (tested using equally-distributed loads upon the shelf). Additional weight can be accommodated by using rebars for support.

Full Service Wire Weld is a full-service supplier offering store planning, logistics, installation supervision, custom and stock fixtures, and CAD drawings with 3D illustrations.

Support Our products are designed to be easy to assemble and provide years of maintenance-free performance. If you ever need assistance with Wire Weld systems, just give us a call.

Custom Orders Available Wire Mesh Shelves can also be ordered in custom sizes that aren't included in the standard sizes above.

Accessories Give your wire shelving a contemporary, upscale appearance with our line of accessories. And like our shelving components, they're easy to assemble: valance band • kick base • side base • dividers • casters (and bases) • masonite doors/door kits • plastic end caps • gable bracket set • faux lipshelf • foot plate
